

Sintex proudly supplied Renotuf tanks to Wings of Grace, a Switzerland based NGO, to quench the thirst of people looking for safe and hygienic drinking water storage solutions

A pioneer in water storage solutions, Sintex has always strived to address the needs of people and places engulfed with paucity of water resources and lack of hygienic and sufficient water storage solutions. With an objective to lend a helping hand to the drinking water storage needs in the town of Bet-Dwarka, Sintex joined hands with Switzerland based NGO, Wings of Grace International, to meet with the rising demand for a hygienic and efficient drinking water facility. The Swiss NGO is known for its contributions in donating drinking water tanks in areas (mainly in Islands) where people are facing acute drinking water scarcity all over the world.

The distribution of tanks spearheaded by the NGO lead to an exalted state of excitement as well as elation. Recipients of the tanks expressed their gratitude towards the NGO and also were completely satisfied with the brand of tanks that were donated to them. Once again Renotuf tank became the cynosure of all eyes as it became a symbol of a new ray of hope for all of them.

Wings of Grace, commenting on the overwhelming feedback the NGO received shared, "People were really happy to see that we had Renotuf tank to give them as most of the people know it's a very good quality tank."

The noble gesture has not only put the spotlight on addressing the crucial water needs of the masses in the country, but also how Sintex and its basket of products have established a powerful brand recall. A brand recall that is synonymous with the company's vision to augment the quality of life around.

Sintex is also looking forward to setting up a national tie up with the NGO to further the organisation's noble cause.
